Professional Experience

- Clinical specialist – Kinetika Clinic Dubai; November 2024- present
Appointed as a Vestibular Specialist to spearhead the development and leadership of the clinic's vestibular services. Entrusted with the mission to establish the first dedicated balance centre in Dubai, delivering state-of-the-art vestibular rehabilitation. Focused on positioning the clinic as a regional leader in evidence-based, multidisciplinary care for complex balance and vestibular disorders, while driving innovation and excellence in patient outcomes.
- Head and Neck Physical Therapist – Cleveland Clinic Abu Dhabi; May 2022 - November 2024
Lead the assessment and treatment of adult and geriatric patients with

central and peripheral vestibular disorders and maxillofacial dysfunctions. Beyond routine care, meticulously measure outcomes and maintain detailed documentation on EPIC.

1. Lead of Vestibular Service:

- Establish and manage a dedicated vestibular clinic within the neurology rehabilitation department.
- Collaborate with team members and leadership to pioneer a specialized pathway that improves outpatient care outcomes.

2. Lead of Maxillofacial Rehabilitation Service:

- Launch and shape the Maxillofacial Rehabilitation Service, implement tailored interventions for myofascial pain, maxillofacial disorders, and facial paralysis.
- Achieve excellence in patient care through personalized rehabilitation plans.

3. Clinical Pathway with CARF Standards:

- Collaborate with the Dentistry Department to establish a comprehensive clinical pathway meeting CARF standards.
- Streamline processes, ensuring high-quality care aligned with industry best practices.

4. Education and Mentorship:

- Conduct educative presentations throughout the rehabilitation department, reaching caregivers and the public.
- Demonstrate commitment to education through preceptorship responsibilities for students, interns, and graduate trainees, fostering the next generation of healthcare professionals.

5. Collaborative Leadership:

- Work closely with hospital leadership to create efficient clinical pathways and workflows.
 - Contribute to interdisciplinary cooperation with the dentistry department, elevating standards for comprehensive patient care.
- Physical Therapist – Clemenceau Medical Centre Beirut affiliated with John's Hopkin's international; July 2018- March 2022
 1. Vestibular Rehabilitation Therapist | The Ear Institute Clinic
 - Pioneered the establishment of the region's first vestibular clinic, securing approvals from healthcare providers and insurers.
 - Specialized in treating diverse vestibular disorders, including vestibular neuritis, post vestibular Schwannoma resection, BPPV, Meniere's disease, PPPD, and unilateral/bilateral vestibular weakness.

- Created a dedicated vestibular pathway for in and outpatients within the neurology rehabilitation department.
 - Delivered comprehensive care, collaborating with families and staff, addressing myofascial pain, maxillofacial disorders, and facial paralysis.
 - Established evidence-based patient assessment and treatment protocols, incorporating objective reassessment throughout therapy sessions.
 - Successfully managed patients with temporomandibular joint dysfunction, facial paralysis, dizziness, and vertigo, pre-operatively and post-operatively.
2. Physical Therapist – Generalist | Clemenceau Medical Centre Beirut
- Assessed the needs of in-hospital and out-patients, designing effective and advanced treatment plans for their recovery.
 - Specialized in treating orthopaedic, rheumatologic, and trauma cases, sports injuries, neurological disabilities in paediatric, adult, and geriatric patients.
 - Maintained accurate and organized patient documentation, ensuring efficient and comprehensive care delivery.
